## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a biosensor, is for example classified in class 530, subclass 350.
- II. Claims 14-28, drawn to a method for analyte detection, is for example classified in class 435, subclass 973.

The inventions are distinct, each from the other because of the following reasons:

The inventions of groups I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP 806.05(h)). In the instant case the analyte detection method does not require the biosensor. Analyte detection can be accomplished using other methodology.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.1.43).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is (703)305-4243. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.
